Object-Oriented Analysis and Design

Here's the course you requested.

Course ID: 103430

Name: Object-Oriented Analysis and Design

Major: Software Engineering

Ask Farah

Description:
This course introduces the object-oriented analysis and design, which includes the Unified Process development cycle; object oriented principles (encapsulation, inheritance, polymorphism), use case analysis; Unified Modeling Language (UML), dynamic and static diagrams; design principles (coupling and cohesion) and design patterns. The course includes a large-scale software-development project.

Pre-requisite:
- Object-Oriented Programming
- Software Design and Development

Proceeding Course/s:
- Agent-Based Modelling
